What are the key opportunities you see for the OIX in 2021?

- To be a critical friend and a leading voice with UK Government in their continued development of a Trust Framework for digital identity in the UK. Now that the dynamic with government has changed OIX has an opportunity to be more forthright in its views.
- To make the case for the wider implementation of attribute services, authoritative sources of trust, and associated standards to enable interoperability on a national and international basis
- To identify key use cases for digital identity and trusted attribute data that deliver on real issues such as social inclusion rather than simply digitising services that are not compelling for users

How will you demonstrate your commitment to the work of OIX in terms of resources, focus and leadership?

- ID Crowd members have been involved in OIX since 2013 having been involved in the initial creation of OIX UK through the Cabinet Office and GDS
- Over the years we have been regular contributors to OIX deliverables and working groups and intend to continue in that vein leading the discussion and pushing for change

What would you like to see accomplished, and how do you plan to make these things happen?

- Champion the assurance and certification of key identity ecosystem elements in support of wider interoperability and a multiplicity of identity schemes.
- To extend OIXs reach beyond the UK and to become a global voice in the development digital identity

What resources will you and your organisation bring to help OIX attain its goals?

- The ID Crowd team is constantly at the forefront of digital identity development on a global scale. We have been instrumental in population scale identity systems, have driven the development of international standards and law regarding digital identity, and have experience in both the public and private sectors.

What current or past experiences, skills, or interests will inform your contributions and views?

- An intimate knowledge of UK Government with regard to identity including GDS, NHS, and DWP where we have played pivotal roles.
- Developing a framework for trusted Business Attribute Data provision in BEIS
- Contributing to the development of the OIX Trust Framework guidance
- Contributing to key standards such as NIST 800.63 and GPG45
