OIX UK Sandbox – DRAFT

Registrant:
OIX UK
2400 Camino Ramon Suite 375
San Ramon, CA 94588

The Open Identity Exchange (OIX) is a technology agnostic, non-profit trade organisation of leaders from competing business sectors focused on building the volume and velocity of trusted transactions online. OIX enables members to expand existing identity services and serve adjacent markets. Members advance their market position through joint research and engaging in pilot projects to test real world use cases. The results of these efforts are published via OIX white papers and shared publically via OIX workshops.

The OIX UK Europe Chapter (trading as OIX UK) was approved by the OIX Board of Directors and the Chapter continues to organise its objectives and structure to best serve OIX members in this region. This initial mission statement reflects the global OIX purpose of accelerating the adoption of digital identity services based on open standards. The OIX UK Chapter overview will provide initial information and this short presentation gives more detail of what OIX UK does and doesn’t do.

OIX UK Sandbox Overview
OIX UK Sandbox enables organisations to conduct initial testing projects so that they can achieve an understanding of how to leverage Verify and trustworthy digital identities within their organisations.

Any organisation that wants to test Verify can do so by engaging with a certified hub providers which can be seen ...

Certification means that these providers have reached a minimum set of standards for Verify and can therefore be trusted by other organisations.
