Sharing Economy		GDS	Technical Integration with Idemia Sandbox completed and user survey to be undertaken
Using Verify for Local Authority Multi Service Portals (Alpha Project)		GDS	Confirming RP processes in scope. Governance Observations. Assess options for Self-Certification. Start UI Design Work
LIGHTest	OIX/EU Grant	Two Pilots kicking off General Meeting: March 6 - 8th	Pilots: Digital Signatures: IBM Cross Border Trust Services: Correos

OIX OPEN IDENTITY
EXCHANGE Workshop

Using Verify for Local Authority Multi Service Portals (Alpha Project)

- Helping hard to reach groups achieve a GOV.UK Verify identity

- Using locally held data as additional identity evidence

- Using existing face to face processes in LAs and HAs

- Project streams:
    - Information Governance
    - Technical design and build
    - Business Case
    - User Journey
    - Industry engagement

- White paper expected in May 2018

LIGHTest: Correos Pilot

- LIGHTest will be integrated into the cloud-based e-Correos platform for trusted communications
  - Generate new positive business cases, reduce user administrative overhead and decrease cost
- Will validate and assess LIGHTest features including:
  - Use of internal LIGHTest Trust Scheme Publication Authority for trust lists issued by Correos partners
  - Extend e-Correos use beyond Europe and use certificates from Turkey and US
  - LIGHTest libraries for validation of qualified/advanced electronic signatures
  - Use of mobile IDs, derived with LIGHTest WP7
  - Use LIGHTest to verify complete electronic transactions based on a trust policy

LIGHTest: IBM Pilot

- LIGHTest will be integrated into a PEPPOL e-Invoicing infrastructure and application scenario
  - LIGHTest will be activated and integrated in different pilot scenarios

- Objectives of the pilot
  - demonstrate the ease of integrating LIGHTest in existing applications and gateways
  - explore the alternatives of integrating LIGHTest as a business application feature or as a service from a PEPPOL or eSENS GW
  - demonstrate the delegation-enabling of an application
  - LIGHTest will be used validate seals directly, as well as use delegation based on LIGHTest delegation publisher operated by a business register as well as a by the invoice issuer to authorize its employees to issue invoices
